## Professional History

---

### August/2024 to Now – Um a Mais

**Role: Ruby on Rails Developer**

**Activities:**

- Responsible for bug resolution and implementation of new features
- Creation of automated tests
- Hands-on experience with container orchestration and Terraform for IaC

### January/2022 to February/2024 – Mainô Sistemas

**Role: Ruby on Rails Developer**

**Activities:**

- Responsible for bug resolution and the creation of new features for a Ruby on Rails monolith, focusing on ensuring both the functionality and scalability of the application;
- Modeling and updating database tables and entities;
- Creation of automated tests;
- Implementation of business logic as code;
- Implementation of RESTful APIs for communication with other services and third-party integration;
- Asynchronous task processing in the background with Jobs and Workers;
- Integration of webhooks and websockets, enabling real-time communications and dynamic interactions between the client and the server.

### 2021 – Freelance

**Role: Webmaster and Developer Freelancer**

- Creation of websites with WordPress, using templates and making adjustments with HTML, CSS, and PHP when necessary;
- Performing webmaster activities, such as domain creation, hosting on services like HostGator and LOCAWEB, and configuring WordPress and FTP settings.
